

SPECIAL OFFER

DLyte mini

DLyte Mini is the ultimate ultra-compact polishing solution for dental laboratories that need to automate their polishing processes at a very low outlay, while obtaining high-quality, consistent results in a single step.

This machine is suitable to polish 2 RPDs and is equipped with a polishing unit and a two-stage cleaning system that thoroughly rinses the piece and removes any remaining electrolyte, after the polishing, offering the most complete solution in a compact system.
